

The Department of Nutritional Sciences Fall 2024 Seminar Series

"Metabolic Phenotypes in Pregnancy: Implications for Maternal and Child Health Across the Lifecourse "

Ellen C. Francis, Ph.D.

Assistant Professor

Dept of Biostatistics and Epidemiology | School of Public Health
Rutgers Biomedical Health Sciences

Host: Tracy Anthony, Ph.D.
Professor of Nutritional Sciences, Rutgers

Wednesday, September 25, 2024 @ 2:15 PM

FSNS Building, 65 Dudley Road, New Brunswick, Room 120

Zoom option: <https://go.rutgers.edu/Francis-Seminar>

This seminar will cover epidemiological studies, including some of Dr. Francis's own work, that have used biochemical markers and metabolomics measured in pregnant women to refine our identification of different metabolic phenotypes in pregnancy. The short and long-term impacts of Gestational Diabetes and obesity in pregnancy will be a central theme.
